

**JENNA DAHMAN**  
Metallurgical Laboratory Supervisor

## New Metallurgical Analysis On-Demand Webinar

Our new medical device testing [webinar](#) guides you through the metallurgical evaluations that are required for medical device characterization including applicable standards.

Porous coating, microstructure, grain size, microhardness, crack initiation and propagation evaluations and fractography are reviewed in this short webinar (4:22 min).

## MDT Integration Completion Celebrated with a Boat Tour!

MDT's integration into Element has been completed and was celebrated by the team with a wonderful boat tour on Lake Minnetonka (before the long freeze!).

Thank you to all our customers for working with us to make this transition go really smoothly. We are excited to be part of Element and offer you more medical device testing options. [Press Release](#)

## ISO 17025 Scope Expansion

We are proud to announce that our ISO/IEC 17025 [scope expansion](#) has been approved by the American Association for Laboratory Accreditation (A2LA)!

Our cardiovascular scope has been expanded to include standards for testing hip, knee, and spinal implants and other medical devices.

## Welcome Carlton Jones!

We are excited to announce that Carlton Jones has joined MDT as a Medical Device Test Engineer!

Carlton holds a Mechanical Engineering Bachelor's degree from the University of Minnesota-Twin Cities and brings experience working with clients having worked as a Design Engineer at RFA Engineering, a product development and engineering services company. Joining us in welcoming [Carlton](#) to the MDT team!
