### Neurostimulator Lead Testing White Paper

Our new neurostimulator lead testing [white paper](#) outlines example tests per ISO 14708-1, ISO 14708-3, IEC 60601-1 and IEC 62353. We cover 10 different tests, including current leakage test, defibrillation exposure and dielectric strength test, as examples of MDT's capabilities.

### Neurostimulator Lead Testing Tip

Check out our new [testing tip](#) where we discuss some practical aspects of neurostimulator lead testing such as storage solutions, sample handling and gripping. The tricks of the trade are at your fingertips.

### Neurostimulation Background Material

If you are new to neurostimulation or curious to learn more about this fast-growing field, you can check out these two publications, [Neuromodulation: Present and Emerging Methods](#) and [Emerging Applications of Deep Brain Stimulation](#), both available as free full text from PubMed.
